

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harvey Cohen on February 14, 2007.

The application has been amended as follows:

Claims 49 and 50, line 2, delete "and" and insert "or".

The following is an examiner's statement of reasons for allowance: The prior art of record, either alone or in combination, fails to anticipate or render obvious the instantly claimed composition. As argued by applicant', the prior art fails to teach or suggest solubilization of a Group VIB metal component, but an insufficient amount of phosphorus component to solubilize the Group VIII metal containing component. There is no suggestion or motivation for selection of this amount of phosphorus component that will result in a composition wherein the Group VIII metal component is not solubilized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
